### **DETAILED ACTION**

Claims 1-15 are pending.

#### ***Priority***

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in France on July 1, 2002. It is noted, however, that applicant has not filed a certified copy of the FRANCE 0208212 application as required by 35 U.S.C. 119(b).

#### ***Specification***

This application is a 371 of PCT/FR03/02039 filed July 1, 2003. It is requested that Applicant update the status of the instant application in the specification, at page 1, line 1.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on July 8, 2005, was filed and received. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

#### ***Election/Restrictions***

Applicant's election without traverse of Group I, claims 1-4, in the reply filed on November 27, 2007, is acknowledged. Claims 5-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention(s), there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 27, 2007.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-4 provide for the use of compositions of microorganisms, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced. Also it is unclear whether the claims are directed to a composition or a process per se. The metes and bounds of the claims can not be determined.

Furthermore, claim is rendered vague and indefinite for reciting that the bacterium or bacteria are chosen from *Streptomyces* genera, of which is not bacteria but are yeasts. Thus, the claim is not clear as to whether they intend bacteria or yeast.

***Claim Rejections - 35 USC § 101***

Claims 1-4 are are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by WO94/19950, cited on enclosed PTO-1449 Form.

Claims are drawn to application of compositions of microorganisms for biologically controlling the cryptogamic vine diseases, characterized in that it comprises in a mixture at least one bacterium and at least one yeast, the bacterium or bacteria and the yeast or yeasts being non-toxic to the plant. The bacteria can be *Bacillus subtilis* and the yeast can be *Pichia*.

WO94/19950 teaches application of compositions of microorganisms for biologically controlling the cryptogamic vine diseases, characterized in that it comprises in a mixture at least one bacterium and at least one yeast, the bacterium or bacteria and the yeast or yeasts being non-toxic to the plant. The bacteria can be *Bacillus subtilis* and the yeast can be *Pichia*. See the abstract and page 3, lines 9 and 16.

The claims are identical to the cited disclosure and are, therefore, considered to be anticipated by the teachings therein.

Art Unit: 1651

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
